

Interpost (B₂C Europe) Case Study

Complete Signage Solution for New Distribution Centre

Client's requirements

Interpost had recently moved to a large distribution centre and needed signage from top to bottom. The premises required full branding including large signs at the front of the premises to display their corporate logo. The property also needed health & safety and directional signs throughout the premises, together with car parking signage.

Why they chose the Matters Group

Matters Property Services Group where already working on site with Interpost installing the complete electrical, security and AV solutions.. The client was very happy with the level of service provided and was delighted to discover we also

Benefits to the Client

The client required the signs to be made within a tight timeframe to assure the move to the new facility was a smooth transition. Matters Signage promptly arranged to meet with the client and surveyed the premises to access location, quantity and size of the signage required. Matters produced full layouts which where supplied to the client and worked through until the exact solution was found. Production and installation were carried out swiftly and well within the client's deadline.

Matters Group Solution

The design, manufacture & installation of the following signs within a tight timeframe.

- · Front of building branded signs large format.
- · Car parking signage.
- · Health & safety signs throughout the warehouse.
- Internal directional signs for staff.

"From the initial survey to the design, manufacture and install. The team at Matters signage did a fast professional job and we are delighted with our new branding"
